Jobs to Do

Data Presentation

Data Distribution

Data Analysis

Data Usability

Issues on Jobs Do

Expensive Tools
Flexibility Loss Control Loss
3rd Party Dependency Devices Incompatibility
Training on app usage Heavy charge
Recurrent expense

What Do You Need?

You just need
only 1
application
to cover all these
needs

Now Presenting the App

All your data

always available
ready to be presented
presented in one site

Increase your profit taking off recurrent 3rd party application costs
Gain control you decide what to show, when to show
Put your image your logo, your colors, your branding

The Perfect Balance

what you need

is

what you get

Advantages

ready to use customizable
ownership maintainable lower costs
cutting edge technology easy training support
control branding lightweight compatible
integration with other applications you have
best UX consultants like your doctors

The graphic also features a line chart with two data series (blue and green) showing fluctuating values over time. Two smartphones are shown: the larger one displays the line chart, and the smaller one displays a dashboard with various filters and data points. The background shows a modern office interior with a wooden wall and a white geometric partition.
